

Dear Professor Kucharska-Stasiak

Thank you for sending me the teaching programme and course curriculum of your Bachelors and Masters Degree Courses in Investment and Real Estate. As you know I have over many years, as an active member of both the RICS and TEGoVA, had the opportunity of visiting many universities offering real estate courses throughout Europe and most of those except in the United Kingdom have tended to be one or two year masters programmes for graduates from other 1st degree disciplines. Very few are as thorough and detailed as the one being offered at both Bachelor and Masters level at the University of Lodz. The appropriate comparison should be made with universities in the United Kingdom offering 3 year full time Bachelor degrees, including University of Reading, Oxford Brookes, Sheffield Hallam and Nottingham Trent. In comparison, your programme is not lacking in any respect and follows the current trend of offering a holistic approach to real estate studies.

Of course, the experience, quality and authoritative nature of the teaching staff, which from my knowledge of the University of Lodz is excellent, will also play an important part in the success of the programme. To my knowledge your full time programme is unique to Poland and in certain respects pioneering. However the real estate market in Poland has now been developing for more than 25 years and during that time your university has been at the forefront of educating and training Polish real estate professionals. Such experience means that your Bachelor and Masters degree courses in investment and real estate are based on proven educational foundations with serious intellectual capacity.

I wish you well in the development of this exciting programme.

Kind regards

Krzysztof Grzesik FRICS REV
